SlotBack

Cancelled at 11 pm. Refilled by 9 am.

SlotBack turns last-minute cancellations into booked appointments. It offers the open slot to a business's waiting list, and the first client to tap gets it.

Atreya, founder

02 THE PROBLEM

Every empty chair costs an appointment business twice.

47%

of beauty and wellness businesses get short-notice cancellations or no-shows **every week**.

62%

of clients who cancel give **under 24 hours' notice**, too late to refill by phone.

~7%

of monthly revenue lost on average. **1 in 7** businesses lose 11–20%.

Source: Fresha, "The Hidden Cost of Cancellations", Dec 2025 (200+ businesses, 500 clients, UK). India has no published data yet; our Goa study is collecting it.

03 THE PROBLEM, ON THE GROUND

Today the refill is a receptionist and a phone.

23:42 · THE NIGHT-BEFORE TEXT

"Sorry, can't make it."

Read the next morning, when the slot is already hard to sell.

14:10 · THE SILENT NO-SHOW

Nobody comes. Nobody calls.

A therapist waits, the hour is gone, and so is the client who wanted it.

09:15 · THE PHONE-AROUND

Six calls for one slot.

Two don't answer, three can't come. Forty minutes of staff time, often for nothing.

ALL WEEK · THE LOST LIST

"Tell me if anything opens."

Clients ask to be squeezed in. Their names end up in a chat thread or nowhere.

04 THE SOLUTION

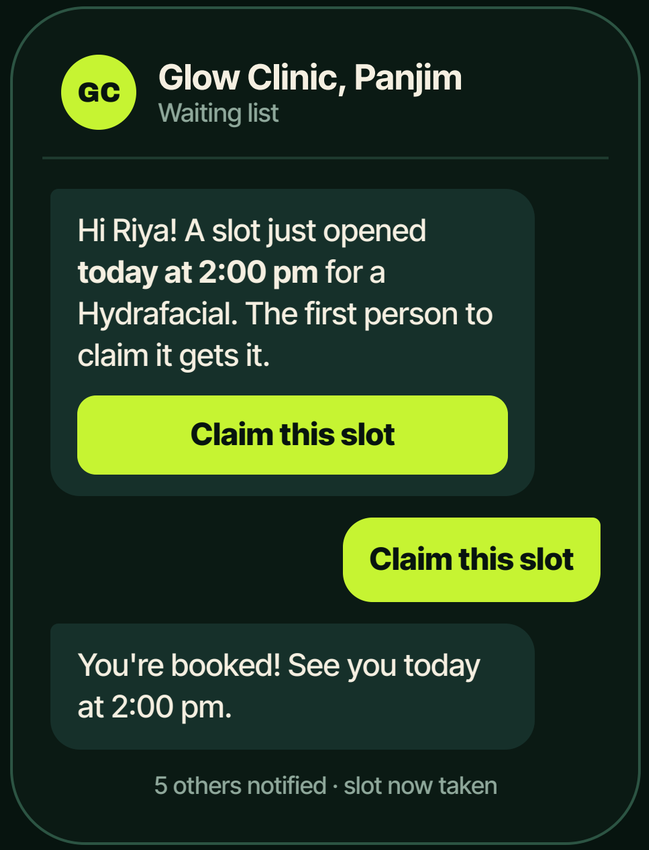

One cancellation. One message. First tap wins.

09:02 Staff mark the 2 pm appointment as cancelled, in three taps.

09:03 SlotBack offers the slot on WhatsApp to waitlisted clients who said 2 pm works.

09:07 The first client to tap claims it. Everyone else sees it's taken. No double bookings.

09:07 The diary updates and the owner sees the revenue recovered.

05 WHAT THE OWNER GETS

Built for the way Goa businesses already work.

1

No new app for clients

Offers arrive as a WhatsApp message with one link. Claiming works in any phone browser.

2

Works beside any diary

Paper register, WhatsApp or booking software. SlotBack only handles the refill.

3

Safe by design

One winner per slot, expiring links, and only clients who opted in to the waiting list.

4

Proof in rupees

A report of cancellations, refills and revenue recovered, so the owner sees what it earns.

₹999/mo per location. Paid back by one or two recovered appointments a month.
Pilots: free for 2 weeks, then paid only if it fills 3+ slots.

06 MARKET DEMAND

A large, fragmented market that books on WhatsApp.

$28B

India's beauty and personal care market, growing **10–11% a year**.

85–90%

of it sits outside branded chains, mostly with independent owners.

1.89L

registered dentists in India, a fully pre-booked profession.

$780K

recovered in 2024 by one global vendor's waitlist refill feature, from 18K refills.

> The demand is proven abroad. Global tools built automatic refill because it pays. India's independents are the ones left without it.

Sources: Franchise India (Sep 2026); CBHI dentist counts via India Data Map (Aug 2025; our sum of state figures); Zenoti waitlist management page.

07 THE GAP

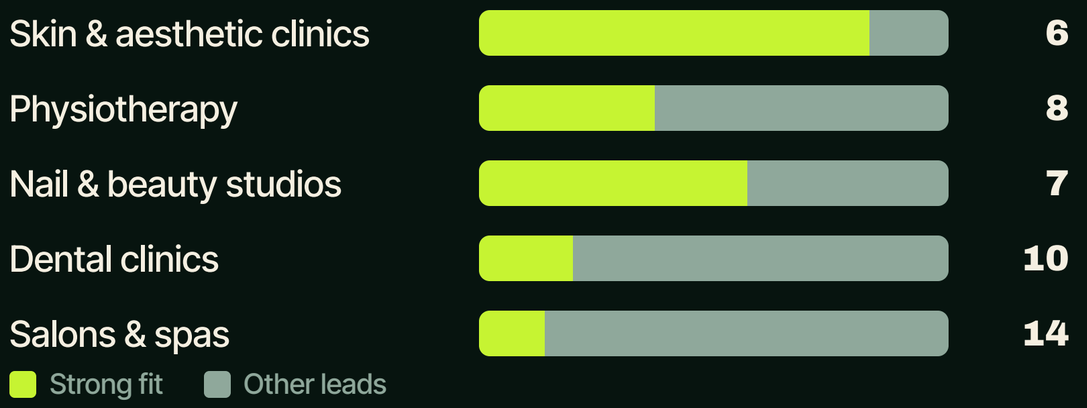

The feature exists. Not for Indian independents.

TOOL	AUTO-REFILLS FROM A WAITLIST	WHO IT'S BUILT FOR	GAP FOR GOA
Zenoti	**Yes**	Chains and enterprise	Too heavy and costly for a one-chair clinic
Fresha	**Yes**	Salons on its marketplace	Clinics and physios don't use it; needs a full switch
Zylu, Dingg, Invoay	**Not listed**	Indian salon POS	Billing and reminders, no cancellation refill
Practo Ray	**Not listed**	Clinics	Records and scheduling, no refill
SlotBack	**Yes, on WhatsApp**	**Independent pre-booked businesses**	**Works beside what they already use**

Sources: vendor pages and Capterra India listings, checked 23 Oct 2026.

08 THE NICHE

Start where one slot is worth ₹1,000+.

45 Goa businesses mapped from public listings in one day. 16 are strong fits.

Appointment-only. No walk-ins to fill gaps for free.

High ticket. Laser, Hydrafacial, rehab and dental sessions run ₹1,000–10,000.

Booked on WhatsApp. No software to replace, nothing to integrate.

Not general salons first. Panjim haircuts average ₹275–500 and walk-ins cover gaps.

09 GROWTH PLAN

From 0 to 500 locations, one city at a time.

Targets, not results. Revenue assumes ₹999 per location per month.

10 HOW WE'LL DO IT

Listen first. Prove it in rupees. Then scale.

STEP 1 · LISTEN

Goa market study

Meet 30+ owners, measure their real cancellations, and share the findings report free with everyone who takes part.

STEP 2 · PROVE

Paid pilots

Free 2-week setup. Paid only if it fills 3+ slots. Every pilot becomes a case study with recovered rupees.

STEP 3 · SCALE

Chains and referrals

Multi-branch groups (5 sites in one deal), owner referrals, and partners who already serve clinics.

Gate 1: 3 paid pilots by day 30 **Gate 2:** 10 paying by day 75 **Stop signal:** fewer than 3 in 15 owners see 2+ cancellations a week
